SUMMARY

DevOps & DevSecOps Engineer with **5+ years** orchestrating, fortifying, and scaling **AWS** and **Azure** cloud platforms. Skilled in **CI/CD**, **IaC**, **Kubernetes**, **DevSecOps automation**, and **security observability**. Proven ability to **architect resilient, secure, high-performing systems**, collaborate with **SRE and Security teams**, and deliver measurable improvements in **operational efficiency, security posture, and incident response**.

PROFESSIONAL EXPERIENCE

JPMorgan Chase | DevOps Engineer | USA

July 2025 - Present

- Engineered enterprise cloud observability across **AWS**, integrating **Splunk, Prometheus, and Grafana** to monitor **1,200+ metrics**, detecting system anomalies and preventing **over 50** potential production incidents annually.
- Spearheaded development of **SIEM dashboards** and implemented automated alerting pipelines, correlating cloud, app, and **IAM** logs to investigate 300+ security events monthly, enabling faster resolution of high-priority threats.
- Governed **IAM** and **RBAC** policies for 900+ users and workloads, completing quarterly **SOX audits** with no access violations and streamlined entitlement reviews, saving 200+ engineering hours per quarter.
- Fortified cloud environments through security baselines, OS patching, and configuration drift detection, securing **6 production environments** that support **24x7 trading** and payments platforms.
- Directed incident response and **CI/CD release operations**, restoring **15 critical services** during priority incidents and improving overall system uptime.
- Mentored **5+ junior engineers**, authored **runbooks**, and enhanced operational reliability, strengthening team readiness and system resilience.

James Fisher Straininstall | Cloud DevOps Engineer | UAE

May 2022 - August 2023

- Orchestrated **CI/CD pipelines** and infrastructure workflows using **Docker, Ansible, Python, and Bitbucket**, managing **40+ production cloud resources**, and reducing deployment errors by **over 30 incidents per year**.
- Implemented Azure **IAM governance** with **RBAC** and managed identities, securing **150+ critical industrial workloads** and eliminating unauthorized access incidents.
- Consolidated monitoring via **Azure Monitor, Log Analytics, Application Insights, CloudWatch**, enabling **detection of over 100 system anomalies monthly** before impacting production.
- Stabilized Linux workloads (Debian, CentOS) and fine-tuned **PostgreSQL** databases, improving resource utilization across 20+ production databases and cloud workloads.
- Migrated legacy and hybrid systems using **encrypted networking** and private endpoints, increasing platform resilience for **over 10 industrial applications**.
- Facilitated incident response and release operations, restoring critical services within **2 hours** for 95% of high-priority incidents.

KPMG | DevOps Engineer | UAE

September 2020 – April 2022

- Deployed centralized telemetry and log collection using **AWS CloudWatch and X-Ray**, monitoring **800+ application and system signals**, enabling faster detection and resolution of system issues for multiple clients.
- Engineered security observability pipelines with **CloudTrail and VPC Flow Logs**, investigating **200+ security events monthly**, strengthening compliance tracking and risk mitigation across enterprise workloads.
- Administered IAM governance for **600+ identities**, implementing permission boundaries and role chaining to ensure **full compliance** with internal controls and regulatory standards.
- Automated policy compliance validation and configuration drift detection via **AWS Config and Python**, maintaining **audit-ready environments** for quarterly reviews without exceptions.
- Maintained Linux compute environments through patch orchestration, service hardening, and configuration validation, reducing **system misconfigurations across 5 production environments**.
- Coordinated incident resolution using runbooks and post-incident reviews, restoring **12 priority services**, improving client satisfaction and system uptime.
- Refined CI/CD pipelines and automated deployment workflows using **Jenkins and Git**, accelerating deployment speed for **multiple client applications** and reducing deployment errors.
- Collaborated with cross-functional teams to implement monitoring dashboards and alerting mechanisms, improving visibility for **300+ critical applications** and enabling proactive incident management.

Schneider Electric | Cloud Engineering Intern | UAE

June 2020 – August 2020

- Configured **RBAC**, **network ACLs**, and identity permissions for cloud-connected industrial systems, supporting secure access management for **40+ user roles** across critical infrastructure workloads.
- Assessed security controls across **cloud-integrated OT and ICS/SCADA environments**, reviewing firewall rules, segmentation policies, and least-privilege alignment under senior engineer supervision.
- Supported threat-hunting and incident readiness by analyzing **25+ simulated security events** for cloud-connected and edge systems, contributing to detection and containment workflows.
- Mapped **IoT and cloud security requirements** to **NIST 800-82** and **ISO 27001**, documenting access reviews and producing **10+ technical artifacts** used for risk assessments and compliance reviews.

TECHNICAL SKILLS

- **Programming & Scripting:** Python (PySpark, Pandas, NumPy), SQL, Bash, PowerShell
- **Cloud Platforms & Services:** AWS (EC2, S3, VPC, IAM, RDS, ELB, EKS), Azure (VMs, VNet, Azure AD, Defender), GCP, Infrastructure Monitoring & Telemetry (CloudWatch, X-Ray, Azure Monitor), Observability Dashboards & Alerts (Grafana, Prometheus, ELK Stack)
- **CI/CD & Automation:** Jenkins, GitHub Actions, Azure DevOps, Bitbucket CI/CD, pipeline automation & optimization
- **Containers & Orchestration:** Docker, Kubernetes (EKS/AKS), Helm, Container Security / Hardening
- **Infrastructure as Code & Configuration:** Terraform, CloudFormation, ARM templates, Ansible, Configuration
- **DevSecOps & Security:** IAM, RBAC, Zero Trust, vulnerability scanning, SIEM (Splunk), MITRE ATT&CK, NIST, ISO 27001, OWASP Top 10
- **Security Tooling & Secrets Management:** Trivy, Snyk, Checkov, tfsec, Semgrep, SonarQube, Gitleaks, HashiCorp Vault, AWS Secrets Manager, Azure Key Vault, CloudTrail
- **Monitoring & Observability:** Prometheus, Grafana, CloudWatch, ELK stack, Real-time Metrics Collection & Alerts
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis
- **OS & Scripting:** Linux (Ubuntu, Debian, CentOS), Windows Server, Bash, Python, PowerShell
- **Networking & Tools:** Load balancers, firewalls, DNS, Wireshark, Nmap
- **Version Control & Ways of Working:** Git, GitHub/GitLab, Agile (Scrum), Runbook & Incident Automation

EDUCATION

Illinois Institute of Technology, Chicago, IL

Master of Applied Science in Cybersecurity

August 2023 – May 2025

Rochester Institute of Technology, Rochester, NY

Bachelor of Science in Computing Security

August 2017 – December 2021

PROJECTS

ATO Detection & Auto-Containment | [Link](#)

- **Developed** real-time account takeover detection for **10,000+ users** using Datadog signals, Flask webhooks, and Azure Functions, programmatically revoked compromised sessions, preventing over **1,500 fraudulent logins**.

Azure Event-Driven URL Scanner | [Link](#)

- Built an **event-driven URL scanning microservice** using **FastAPI** on **Azure Container Apps**, provisioning infrastructure with **Terraform IaC** and implementing **GitHub Actions CI/CD** via **OIDC authentication** without long-lived cloud credentials.

Splunk Enterprise + Splunk SOAR Homelab | [Link](#)

- Deployed a **24x7 SIEM/SOAR environment** using **Splunk Enterprise Security** and **Splunk SOAR**, ingesting **Windows and Linux logs** to support centralized monitoring, alert triage, and automated response workflows.

CERTIFICATIONS

- **CompTIA Security+** | [Link](#)
- **Amazon Web Services Certified Cloud Practitioner** (In Progress — Expected Feb 2026)
- **Amazon Web Services Certified DevOps Engineer – Professional** (In Progress — Expected Feb 2026)
