PROFESSIONAL SUMMARY

Security & Software Engineer with 3 years of work experience coding, problem-solving, securing, and automating Linux & cloud deployments for production environments. Proven in risk assessment, zero-trust, and 24x7 SIEM/IR operations. Skilled in decision-making and communicating with relevant stakeholders to embed guardrails without slowing delivery. Security+ certified and pursuing certifications in AWS/Azure.

EDUCATION

Master of Applied Science in Cybersecurity (M.A.S.)

Illinois Institute of Technology, Chicago, IL

Sep 2023 – May 2025

Bachelor of Science in Computing Security (B.Sc.)

Rochester Institute of Technology, Rochester, NY

Sep 2017 – Dec 2021

Extracurricular: Dean's List, 2020 Collegiate Penetration Testing Competition (CPTC) Regional Winners, Research Assistant in Intelligent Security Systems, IT Consultant at International Consulting Network (ICON)

EXPERIENCE (3 Years)

Software Engineer – Security & Detection Focus

James Fisher Strainstall, Dubai, UAE

May 2022 – Oct 2023

(1 Year 6 Months Experience)

- Developed a Smart Asset Management System using Django and JavaScript, integrating security controls and REST APIs to improve asset tracking efficiency for 150+ assets while adhering to SDLC best practices.
- Strengthened application security by 30% through secure coding standards (OWASP) and proactive threat detection techniques.
- Led AWS migration for a multi-service platform, integrating IAM roles, security groups, and encryption in transit/storage, while improving system availability by 45%.
- Oversaw server maintenance and vulnerability management in Debian/CentOS environments, optimizing PostgreSQL performance and reducing incident resolution time by 20% through root-cause analysis.
- Developed and containerized Python modules to automate real-time alerts, reducing MTTR by 35% and improving threat triage capabilities.
- Drafted 20+ SOPs covering secure deployment, code maintenance, and incident response, enhancing cross-team readiness and onboarding.
- Automated infrastructure security and network controls using Ansible and Terraform within CI/CD pipelines (Bitbucket), applying IAM policies and enforcing least privilege access for AWS resources.
- Reduced downtime by 20% for resources such as EC2 and Lambda functions with AWS Elastic Load Balancer.
- Centralized AWS log streams in CloudWatch, accelerating detection of critical threats and reducing escalation time by 25%.

Technical Support Engineer – Cybersecurity & Endpoint Security

Neutral Fuels Holdings Ltd, Dubai, UAE

Jun 2021 – Mar 2022

(10 Months Experience)

- Led company-wide migration to Microsoft 365 Business and Exchange for 200+ users, improving endpoint security and productivity by 70%, while coordinating responses to security threats.
- Deployed mail filtering rules and quarantine protocols, boosting phishing/spam detection and cutting incident response time by 40%.
- Deployed Wireless Mesh Networks with Cisco APs across 3 office zones, integrating firewall-based anomaly detection and improving uptime.
- Authored ITIL-compliant SOPs and secured 100+ endpoints using Intune, JumpCloud, and SureMDM, improving collaboration between IT and security.
- Rolled out Azure AD features including SSO, MFA, and Conditional Access to increase BYOD security coverage by 45%.
- Established Freshservice helpdesk for 200+ users, enhancing incident tracking, troubleshooting, and ticket resolution efficiency by 60%.
- Presented technical findings and incident reports to stakeholders, improving interpersonal, written and communication skills.
- Managed hardware/software procurement lifecycle and optimized security tools, contributing to continuous risk mitigation and reducing system vulnerabilities by 25%.

Cybersecurity Engineer Intern

Schneider Electric, Dubai, UAE

Jun 2020 – Sep 2020

(4 Months Experience)

- Configured access controls for customer systems and tailored security solutions to mitigate vulnerabilities in operational environments, enhancing system security and reducing potential threats
- Completed hands-on training in ICS/SCADA cybersecurity and participated in internal threat-hunting exercises across industrial systems, improving threat detection capabilities and strengthening overall security posture
- Developed and presented cybersecurity strategies for IoT devices, aligning with NIST guidelines and contributing to incident response plans.

PROJECTS

Azure Secure Microservice Blueprint — [Link to project](#)

July 2024 – Present

- Built a secure, event-driven microservice on Azure Container Apps (FastAPI + worker) with Terraform and GitHub Actions (OIDC), using Key Vault secret refs, Service Bus, and KEDA autoscaling.

Splunk Enterprise + Splunk SOAR Homelab — [Link to project](#)

May 2024 – Present

- Built a 24x7 Splunk ES homelab (Developer License) that ingested Windows/Linux logs, monitored alert queues, triaged events, escalated incidents, and executed SOAR playbooks for auto-containment.
- Demonstrated end-to-end SIEM and SOAR capabilities for real-time threat detection and remediation (e.g., blocking IPs, notifying teams).

Server Hardening Playbook — [Link to project](#)

Jan 2023 – Present

- Created a fully automated, open-source, and idempotent Bash script to harden Linux servers by enforcing password policies, configuring firewalls/SSH, and disabling insecure services, improving baseline security compliance across 10+ systems.

SKILLS

- Cybersecurity Frameworks:** MITRE ATT&CK, NIST, ISO 27001, ITIL, SOX, PCI
- Programming:** Python, C, Ruby, Bash, SQL (MySQL, PostgreSQL), NoSQL (MongoDB, Redis), JavaScript, HTML, CSS
- Operating Systems:** Windows 10/11, Windows Server (2012/2016/2019), Linux (Kali, Debian, Ubuntu, CentOS), MacOS
- Tools:** Splunk, SOAR, Datadog, Nmap, Wireshark, Nessus, Burp Suite (DAST), Snyk (SCA), Docker, Kubernetes, Ansible, Powershell, VMWare, Jira, Git, PowerBI, Terraform (IaC)
- Cloud Services:** AWS (EC2, ECS, IAM, Inspector, GuardDuty, RDS, RedShift, Route 53, S3, CloudWatch, CloudFront, CloudFormation), Azure (DevOps, Microsoft Defender for Endpoint), GCP, Microsoft Intune, Microsoft 365, Excel, HashiCorp Vault

CERTIFICATIONS

- Security+, CompTIA — [Link to Certification](#)

Issued: Feb 2025
