PROFESSIONAL SUMMARY

Security Engineer with 2 years' experience designing and automating Linux & hybrid-cloud security controls for always-on production environments. Proven at risk assessment, zero-trust segmentation, and 24×7 SIEM/IR operations. Skilled in collaborating with SRE to embed guard-rails without slowing delivery. Security+ certified.

SKILLS

- **Certs & Frameworks:** Security+, NSE 2, CNSS, MITRE ATT&CK, NIST, ISO 27001, ITIL, SOX, PCI, CPMI
- **Programming:** Python, Django, C, Java, JavaScript, Bash, SQL (MySQL, PostgreSQL), NoSQL (MongoDB, Redis), HTML, CSS
- **Operating Systems:** Windows 10/11, Windows Server (2012/2016/2019), Linux (Kali, Debian, CentOS), MacOS
- **Tools:** Splunk, SOAR, Datadog, Nmap, Wireshark, Nessus, Burp Suite (DAST), Docker, Kubernetes, Ansible, Powershell, VMWare, Jira, Checkmarx (SAST), Snyk (SCA)
- **Cloud Services:** AWS (CloudWatch, EC2, RDS, RedShift, S3, ECS, IAM, CloudFront, CloudFormation, Inspector, GuardDuty), Azure (DevOps, Microsoft Defender for Endpoint), GCP, Terraform, Microsoft Intune, Microsoft 365, SharePoint, GitHub, HashiCorp Vault

EXPERIENCE

James Fisher Straininstall, Dubai, UAE

May 2022 – Oct 2023

Software Engineer

- Developed a Smart Asset Management System using Django and JavaScript, integrating security controls and REST APIs to improve asset tracking efficiency for 150+ assets while adhering to SDLC best practices.
- Strengthened application security by 30% through secure coding standards (OWASP) and proactive threat detection techniques.
- Led AWS migration for a multi-service platform, integrating IAM roles, security groups, and encryption in transit/storage, while improving system availability by 45%.
- Oversaw server maintenance and vulnerability management in Debian/CentOS environments, optimizing PostgreSQL performance and reducing incident resolution time by 20% through root-cause analysis.
- Developed and containerized Python modules to automate real-time alerts, reducing MTTR by 35% and improving threat triage capabilities.
- Drafted 20+ SOPs covering secure deployment, code maintenance, and incident response, enhancing cross-team readiness and onboarding.
- Automated infrastructure security and network controls using Ansible and Terraform within CI/CD pipelines (Bitbucket), applying IAM policies and enforcing least privilege access for AWS infrastructure.
- Reduced downtime by 20% through CloudWatch traffic monitoring and load balancer implementation across distributed services.
- Centralized AWS log streams in CloudWatch, accelerating detection of critical threats and reducing escalation time by 25%.

Neutral Fuels Holdings Ltd, Dubai, UAE

Jun 2021 – Mar 2022

Technical Support Engineer

- Led company-wide migration to Microsoft 365 Business and Exchange for 200+ users, improving endpoint security and productivity by 70%, while coordinating responses to security threats.
- Executed seamless migration of 200+ user mailboxes to Microsoft Exchange, enforcing security access controls and compliance reviews.
- Deployed mail filtering rules and quarantine protocols, boosting phishing/spam detection and cutting incident response time by 40%.
- Deployed a Wireless Mesh Network with Cisco APs across 3 office zones, integrating firewall-based anomaly detection and improving uptime.
- Authored ITIL-compliant SOPs and secured 100+ endpoints using Intune, JumpCloud, and SureMDM, improving collaboration between IT and security.
- Rolled out Azure AD features including SSO, MFA, and Conditional Access to increase BYOD security coverage by 45%.
- Established Freshservice helpdesk for 200+ users, enhancing incident tracking, troubleshooting, and ticket resolution efficiency by 60%.
- Presented technical findings and incident reports to stakeholders, improving decision-making and reinforcing communication skills.
- Managed hardware/software procurement lifecycle and optimized security tools, contributing to continuous risk mitigation and reducing system vulnerabilities by 25%.

Schneider Electric, Dubai, UAE

Jun 2020 – Sep 2020

Cybersecurity Engineer Intern

- Configured access controls for customer systems and tailored security solutions to mitigate vulnerabilities in operational environments.
- Completed hands-on training in ICS/SCADA cybersecurity and participated in internal threat-hunting exercises across industrial systems.
- Developed and presented cybersecurity strategies for IoT devices, aligning with NIST guidelines and contributing to incident response plans.

PROJECTS

Splunk Enterprise + Splunk SOAR Homelab

- Built a 24×7 Splunk ES homelab (Developer License) that ingested Windows/Linux logs, monitored alert queues, triaged events, escalated incidents, and executed SOAR playbooks for auto-containment.
- Demonstrated end-to-end SIEM and SOAR capabilities for real-time threat detection and remediation (e.g., blocking IPs, notifying teams).

• [Link to project](#)

Server Hardening Playbook

- Created a fully automated, open-source, and idempotent Bash script to harden Linux servers by enforcing password policies, configuring firewalls/SSH, and disabling insecure services—improving baseline security compliance across 10+ systems.

• [Link to project](#)

PrivacyFusion

- A PyQt-based toolkit that integrates Diffprivlib and TenSEAL to enable secure, privacy-preserving data analysis and visualization using differential privacy and homomorphic encryption.

• [Link to project](#)

Flask-based Network Scanner

- Built a multi-threaded Flask application that leverages Nmap for concurrent network scans, parses XML results, and displays them via an interactive web UI to streamline vulnerability assessments.

EDUCATION

Illinois Institute of Technology, Chicago, IL

Sep 2023 – May 2025

Master of Applied Science in Cybersecurity (M.A.S.)

Rochester Institute of Technology, Rochester, NY

Sep 2017 – Dec 2021

Bachelor of Science in Computing Security (B.Sc.)

Extracurricular: Dean's List, 2020 Collegiate Penetration Testing Competition (CPTC) Regional Winners, Research Assistant in Intelligent Security Systems, Consultant at International Consulting Network (ICON)
